

## IN THE SPECIFICATION

Please replace the paragraph beginning at page 35, line 14, with:

A sample where only the first layer was formed was produced the same as in Example A1 except that the second layer was not formed. A sample shown in Fig. 13 where a moisture permeable/water proofing film was laminated on the first layer was produced. As the moisture permeable/water proofing film, a polyethylene porous film (~~Polum~~ Porum PUH 35 having 35  $\mu\text{m}$  thickness and 1.1  $\mu\text{m}$  maximum fine pore diameter made by TOKUYAMA Corp.) was used.
